Hart Pableo

Drupal & WordPress Specialist | Full-Stack Web Developer

I am a PHP developer mainly handling Drupal and WordPress websites both on the front-end and back-end. I am greatly passionate about building software that solves people's problems and helps them achieve their goals. And I also have a major focus on efficient code and highly performant and inclusive websites.

EXPERIENCE

Marameo Design, Remote (AU) — *Full-Stack Developer*

NOV 2022 - PRESENT

- Work with an international team in creating unique/exclusive/specialized websites for clients of all scales in industries like research, health, and non-profits
- Develop or contribute to the team's development system
- Conduct monthly website and server maintenance to our clients' sites
- Deal with clients' tickets (e.g. additional features, updates, bug fixes, etc.) for their websites
- Perform website optimization and accessibility procedures to make sure our clients' websites are performing well
- Work on Drupal and WordPress Projects in both front-end and back-end
- Develop custom PHP solutions for very specific client needs

Proweaver, Cebu (PH)— *WordPress Developer*

AUG 2021 - OCT 2022

- Converted website designs into static sites with HTML, CSS, and jQuery
- Convert the static HTML sites into a custom WordPress theme
- Update the websites with content provided by the content writers
- Assist newbie developers with their clarifications or difficulties with their tasks
- Conduct 1-month trainings to the team's newly hired developers

CAREER HIGHLIGHTS

- Handled multiple Drupal and WordPress websites in front-end, back-end, and deployment.
- Optimized legacy websites or projects and improved their scores from 40+ to 80 - 90+ on Google Pagespeed Insights.
- Led the upgrade of the team's custom Gutenberg blocks system to improve code reusability and help clients have a more flexible user experience.

SKILLS

- Custom Drupal and WordPress Theme Development
- Custom Module/Plugin Development
- Data or Content Migration
- TailwindCSS, Bootstrap, ReactJS
- Custom PHP Application Development
- Web Accessibility
- Web Optimization
- Custom Gutenberg Blocks Development for WordPress and Drupal
- Drupal Layout Builder
- Domain Name System (DNS) Management
- Hosting Management
- SQL

TOOLS / SOFTWARE

- PHPStorm (development)
- ClickUp (project management)
- Github (code version control)
- CloudFlare (DNS)
- Cloudways, DigitalOcean, cPanel, WPEngine (hosting)
- OpenAI / ChatGPT (occasional code and research assistant)

- Led the team's implementation of Gutenberg in our Drupal projects. Now both WordPress and Drupal built websites get to experience the comfort of branded custom Gutenberg blocks when creating content.
- Utilized the OpenAI API along with custom programmatic content migration and custom Gutenberg block development to help a research organization team conveniently create and manage their resource citations.
- Write and execute a custom Drupal content and media migration for a Drupal 7 to Drupal 11 project.
- Write and execute a custom content migration from Drupal to WordPress for a research organization website.
- Developed and deployed a custom API that connects to Meta's Conversions API, improving the accuracy of user interaction tracking and analytics for a dermal brand's website.
- Attended WordCamp Asia 2023 in Bangkok, Thailand
